

CSE111 Quiz 3 Question

Question:

Implement the design of the DemonSlayer class so that the following output is produced:

Write your code here

```
print('No of demon slayers:', DemonSlayer.count)
print("=====")
d1 = DemonSlayer("Tanjiro", 15, "Water Breathing", 100)
d1.addKill(20)
d1.printDetails()
print("=====")
d2 = DemonSlayer("Rengoku", 20, "Flame Breathing", 1000)
d2.dismissKill(50)
d2.printDetails()
print("=====")
d3 = DemonSlayer("Zenitsu", 16, "Thunder Breathing", 80)
d3.dismissKill(100)
d3.printDetails()
print("=====")
print('No of demon slayers:', DemonSlayer.count)
```

Output:

No of demon slayers: 0

=====

Name: Tanjiro

Age: 15

Style: Water Breathing

Total Kill: 120

=====

Name: Rengoku

Age: 20

Style: Flame Breathing

Total Kill: 950

=====

Name: Zenitsu

Age: 16

Style: Thunder Breathing

Total Kill: 80

=====

No of demon slayers: 3
