

CSE111 Quiz 2 Question

Question:

Design the Library and Book class so that the expected output is generated.

#Write your code here

```
obj = Library("Ayesha Abed Library")
b1 = Book("Teach yourself C", "Herbet Schildt", "0078823110")
print("=====")
obj.addBook(b1)
print("=====")
obj.printBooks()
print("=====")
b2 = Book("Java:How to program", "Deitel & Deitel")
b3 = Book("Python Crash Course", "Eric Hatthes", "1593279280")
print("=====")
obj.addBook(b2,b3)
print("=====")
obj.printBooks()
print("=====")
b2.setISBN("0134791401")
print("=====")
obj.addBook(b2)
print("=====")
obj.printBooks()
print("=====")
b4 = Book("Automate the boring stuff with Python", "Al
Sweigart", "1593279922")
b5 = Book("Teach yourself C++", "Herbet Schildt", "0078820251")
print("=====")
obj.addBook(b4,b5)
print("=====")
obj.printBooks()
print("=====")
```

Expected Output:

```
=====
Book with ISBN: 0078823110 added
=====
Book name:Teach yourself C Writer:Herbet Schildt ISBN no:0078823110
=====
=====
A book without ISBN cannot be added.
Book with ISBN: 1593279280 added
=====
Book name:Teach yourself C Writer:Herbet Schildt ISBN no:0078823110
Book name:Python Crash Course Writer:Eric Hatthes ISBN no:1593279280
=====
=====
Book with ISBN: 0134791401 added
=====
Book name:Teach yourself C Writer:Herbet Schildt ISBN no:0078823110
```

CSE111 Quiz 2 Question

Book name:Python Crash Course Writer:Eric Hatthes ISBN no:1593279280
Book name:Java:How to program Writer:Deitel & Deitel ISBN no:0134791401

=====
=====

Book with ISBN: 1593279922 added

Book with ISBN: 0078820251 added

=====

Book name:Teach yourself C Writer:Herbet Schildt ISBN no:0078823110

Book name:Python Crash Course Writer:Eric Hatthes ISBN no:1593279280

Book name:Java:How to program Writer:Deitel & Deitel ISBN no:0134791401

Book name:Automate the boring stuff with Python Writer:Al Sweigart ISBN
no:1593279922

Book name:Teach yourself C++ Writer:Herbet Schildt ISBN no:0078820251
